

FUND INFORMATION

RISK PROFILE

RECOMMENDED MINIMUM INVESTMENT TERM

FUND OBJECTIVE

The fund aims to deliver returns in excess of those offered by money market funds and similar levels of liquidity, without significantly increasing risk.

WHO IS THIS FUND FOR?

This fund suits risk-averse investors with a short-term investment horizon and who want yields in excess of those on money market investments, but also require high liquidity from their investment and cannot tolerate the higher risk associated with income funds.

INVESTMENT MANDATE

The fund is a specialist yield-enhanced money market portfolio that offers diversification, high liquidity and very low volatility by investing in money market and short-term debt instruments.

Compared to money market unit trusts, it will have a marginally higher risk exposure in order to provide yield enhancement. However, low volatility is a key criterion for this product. The maximum average duration of this fund is 365 days. Derivatives may be used for efficient portfolio management purposes.

REGULATION 28 COMPLIANCE

The fund does not comply with the asset allocation sublimits set out in Regulation 28 of the Pension Funds Act, and therefore the fund is not Regulation 28 compliant.

and supportive of a rate cut, which is in line with most other central banks around the world.

Due to the inherent risks in the economy, the forward rate agreement (FRA) curve is currently predicting rates to remain unchanged over the next 12 months. At present, 12 negotiable certificate of deposit (NCD) mid-rates are at 7.65%, up 5 basis points (bps) from the beginning of the quarter – with the spread between 12 months and 3 months JIBAR now at just over 90bps.

We are mindful of the potential threats to the economy, which include the ongoing trade war between the US and China, as well as the possibility of an SA sovereign ratings downgrade by Moody's next year. As such, we will monitor these risks and will look to add to our fixed rate exposure at levels that we deem appropriate for the risk being taken. That said, we continue to be buyers of SA Treasury Bills as these securities

are currently trading at premium and offering attractive spreads relative to bank NCDs. In addition, we remain buyers of longer-dated floating rate assets as these instruments help in managing the interest rate risk whilst also ensuring a healthy running yield for the fund.

FUND COMMENTARY

There was a notable weakening in the local rates market following a rather disappointing and uninspiring Medium-Term Budget Policy Statement (MTBPS) in October. This, together with the weak SA growth environment, increased the likelihood of an SA sovereign ratings downgrade next year and has led to an increase in SA money market yields. In addition, we saw Eskom implement a fresh round of rolling black-outs during December, which would have further stifled economic growth. On a more positive note, however, domestic inflation remains low

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

FUTUREGROWTH

/ ASSET MANAGEMENT

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 13:00. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 December 2019.
