

FUTUREGROWTH WINS INTERNATIONAL SRI MANAGER OF THE YEAR AWARD

Futuregrowth Asset Management is proud to receive the 2011 Global Pensions Award for Socially Responsible Investing (SRI).

Global Pensions, which hosted the 10th annual Global Pensions Awards, is the only international magazine serving the institutional pension funds industry across the world.

Futuregrowth has a long and rich history of investing for development in South Africa through managing socially responsible investments on behalf of its clients.

Futuregrowth manages five SRI funds: the Infrastructure & Development Bond Fund, the Development Equity Fund, the Community Property Fund, the SRI Balanced Fund and the recently launched Agri-Fund.

While untold lives have been improved through the high social impact delivered by these funds, they have also added significant value to retirement fund members' portfolios through the achievement of benchmark beating investment performance.

According to Global Pensions, every winner has been singled out by experts in the pension fund industry for the quality of advice or product offered to this very community.

Futuregrowth SRI specialist Angelique Kalam said that because of this, Futuregrowth takes great pride in winning this international SRI Manager of the year award. "It recognises our contribution and expertise in managing socially responsible investments in South Africa."
