FUND INFORMATION

RISK PROFILE

RECOMMENDED MINIMUM INVESTMENT TERM

FUND OBJECTIVE

The fund is strictly managed in accordance with Shari'ah (Islamic Law) and therefore does not invest in shares of companies whose core business involves dealing in alcohol, gambling, non-halal foodstuffs or interest-bearing instruments. The Shari'ah Supervisory Board oversees adherence to the applicable Shari'ah principles. This fund specifically adheres to the standards of the Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI) as interpreted by the Shari'ah Supervisory Board.

WHO IS THIS FUND FOR?

This fund is suited to investors with a long-term investment horizon seeking to maximise growth in a Shari'ah compliant fund. They are able to accept the risks associated with equity funds and also the mandate risk of a more limited investment universe.

NON-PERMISSIBLE INCOME

Incidental income deemed to be non-permissible is paid to the charitable trust elected by the Shari'ah Supervisory Board in line with the principles of Shari'ah and the supplemental deed of the fund. Non-permissible income does not form part of the investor's income.

INVESTMENT MANDATE

The fund is a Shari'ah compliant fund which provides investors with cost-effective access to a broad spectrum of local and international listed investments.

REGULATION 28 COMPLIANCE

The fund aims to achieve long-term inflation-beating growth, and therefore may hold a higher allocation to equities than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

FUND COMMENTARY as at 31/12/2018

2018 was a roller-coaster year that often left us in a disheartened state as markets at times treated investors abysmally. Locally, investors initially experienced the ripple effects of the positive ANC elective conference with South Africa maintaining an investment grade rating

and returning to a stable outlook from Moody's. Assets with higher risk, however, remained under pressure and poor GDP numbers in South Africa did not help the cause.

President Cyril Ramaphosa's economic stimulus package adopted by cabinet saw a short-lived strengthening of the South African rand, then the Turkish lira collapsed and we saw the revived spectre of contagion for emerging markets at play. Inflation numbers were, however, not as high as expected; we saw a 0.25% interest rate hike for SA.

Over the last quarter investors moved into safe havens and defensives within equities. A large portion of equities on the NASDAQ and New York Stock Exchange was trading at new 52-week lows last seen in the 2008 Global Financial Crisis.

Expectations are that the turmoil in equities and a continued global economic slowdown will curb earnings growth and end the equity bull run in offshore developed markets in 2019. Investors will enter 2019 searching for assets that would bring relief after 2018 saw both fixed income and stocks disappoint.

The FTSE/JSE All Share Index (ALSI) was down by 4.88% over the quarter ending December 2018. Large, mid- and small caps returned -5.25%, +2.68% and -7.35% respectively for the last quarter of 2018.

The local currency weakened against the greenback by 1.41%, and appreciated by 0.64% against the sterling. The rand depreciated by 0.26% against the euro for the quarter ending December 2018.

The sectors contributing positively in the ALSI for the quarter were telecommunications and technology, which returned 4.93% and 3.51% respectively. The worst performing sectors for the quarter, down by 18.58% and 8.25% respectively, were consumer goods and healthcare.

This fund is suited to investors with a long-term investment horizon seeking to maximise growth in a Shari'ah compliant fund. They are able to accept the risks associated with equity funds and also the mandate risk of a more limited investment universe.

The fund's current positioning from an offshore allocation perspective is at approximately 30%, providing investors with significant diversification and investment opportunity benefits. In addition, its valuation, sentiment and risk indicators are all attractive compared to its benchmark.

Our strategy seeks to achieve greater return and less volatility than the market over a long-term horizon. Consequently the fund has high exposure to international equities, allowing the fund to achieve greater diversification and, therefore, a reduction in volatility. Through time, equity has achieved greater returns than the other asset classes. Our high exposure to equities benefits from this and, similarly, within equities we are positioned to achieve lower volatility when compared to the fund's benchmark.

* Please note: The Class B1 Fund is only available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.omut.co.za or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 13:00. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 January 2019.
