

# OLD MUTUAL FTSE RAFI® ALL WORLD INDEX FEEDER FUND

DECEMBER 2019

## FUND INFORMATION

### RISK PROFILE

The risk profile does not take the impact of exchange rate fluctuations into account.

### RECOMMENDED MINIMUM INVESTMENT TERM

### FUND OBJECTIVE

The fund aims to provide long-term capital growth by gaining exposure to the FTSE RAFI® All World 3000 Index. This RAFI® Index comprises listed companies rated according to four financial factors: cash flow, sales and dividends (averaged over 5 years) as well as book value at review date.

### WHO IS THIS FUND FOR?

This fund suits investors with a longer-term investment horizon who primarily seek capital growth through exposure to the developed and emerging market equities that make up the FTSE RAFI® All World 3000 Index. These investors do not require income from this investment, and can tolerate stock market and currency volatility.

### INVESTMENT MANDATE

Apart from assets in liquid form, the fund holds participatory interests in only one collective investment scheme, namely the Old Mutual FTSE RAFI® All World Index Fund, which aims to replicate the performance of the FTSE RAFI® All World 3000 Index. The Old Mutual FTSE RAFI® All World Index Fund holds predominantly equity, but may also hold non-equity securities. Derivatives can be used to enable the portfolio to more effectively track the index.

### REGULATION 28 COMPLIANCE

The fund aims to offer exposure to a specific asset class. It holds a higher allocation to both international assets and equities than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

\* Please note: The Class B1 fund is only available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at [www.oldmutualinvest.com](http://www.oldmutualinvest.com) or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 13:00. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- A feeder fund is a portfolio that invests in a single fund which levies its own charges. This could result in a higher fee structure for the feeder fund.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 December 2019.
