

FUND INFORMATION

RISK PROFILE

RECOMMENDED MINIMUM INVESTMENT TERM

FUND OBJECTIVE

The fund aims to offer a combination of capital growth and high income yields. Capital growth is primarily achieved by actively taking advantage of interest rate cycles.

WHO IS THIS FUND FOR?

This fund is suited to astute investors who have a particular view on relative asset class performance. The investor understands the impact of the interest rate cycle and accepts this risk in exchange for moderate long-term growth potential.

INVESTMENT MANDATE

The fund invests across the full spectrum of the yield curve. It invests in public and private sector bonds and deposits, with at least 50% invested in bonds with an effective government guarantee.

REGULATION 28 COMPLIANCE

The fund is not required to be Regulation 28 compliant in terms of its Deed, but the fund manager is mandated to comply with Regulation 28 on a day-to-day basis.

FUND COMMENTARY

The delivery of the 2019 Medium-Term Budget Policy Statement (MTBPS) in October spooked financial markets. Against a much weaker macroeconomic backdrop than anticipated earlier this year, tax revenue collections kept underperforming, while an earlier call for mandatory expenditure cuts was abandoned. Moreover, underperforming state-owned enterprises (SOEs) once again took a bigger slice of the budget cake than earmarked earlier this year. With nowhere to hide, Government is once again forced to turn to financial markets with a higher borrowing requirement. The significant worsening of the fiscal outlook left Moody's rating agency with no choice but to change the sovereign rating outlook from stable to negative.

As would be expected, both nominal and inflation-linked bond yields spiked in response to the worse than expected 2019 MTBPS. With the short end of the yield curve anchored by a benign inflation outlook as well as a reasonable expectation of a stable repo rate path, it was up to the back end of the yield curve to adjust higher. This led to bearish yield curve steepening. In terms of the 10-year point, the yield of the R2030 initially increased sharply from 9.00% at the end of September to 9.27%, but eventually managed to claw back losses to close the quarter only marginally higher at 9.02%.

A strong finish for nominal bonds helped the JSE All Bond Index (ALBI) to render a return of 1.7% for the fourth quarter, slightly ahead of the cash return of 1.6%. For calendar 2019, the importance of base accrual was highlighted by the fact that the ALBI delivered great performance, especially considering the headwinds described above – a classical example of "bad news is already reflected in the price of nominal bonds". For the year, the ALBI returned an inflation-beating 10.3% while cash rendered a return of 6.6%.

The fund underperformed the benchmark by 0.9% on a net-of-fee basis for the 12-month

period ending December 2019. This was mainly due to the more conservative positioning of the fund relative to the benchmark, specifically the underweight modified duration position during the period under review. This was partly offset by the accrual earned from the higher yielding non-government bond holding in the fund.

The fund is defensively positioned with a modified duration position close to that of the All Bond Index. Considering our cautious investment outlook, we continue to favour bonds with a term to maturity shorter than 25 years and an overweight exposure to short- and medium-dated non-government nominal bonds. This position reflects a balance between minimising capital loss in case of rising longer-dated bond yields, and not foregoing all of the accrual offered by the steeply sloped yield curve. The fund will benefit most in the case of bearish yield curve steepening, that is when yields of longer-dated bonds rise by more than those of shorter-dated bonds. It should also benefit in case of a repo rate reduction, especially if the fiscal situation keeps deteriorating.

OTHER INVESTMENT CONSIDERATIONS

MINIMUM INVESTMENTS:

- Monthly: R500
- Lump sum: R10 000
- Ad hoc: R500

INITIAL CHARGES (Incl. VAT)*:

There is no initial administration charge for investment transactions of R500 and above. Initial adviser fee will be between 0% and 0.69%. Investment transactions below the R500 fund minimum incur a 2.30% administration charge.

* Please note: Initial charges do not apply to the Class B funds.

ONGOING

	Class R	Class B1*
Annual service fees (excl. VAT)	0.75%	0.60%

* Please note: The Class B1 fund is only available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms.

TAX REFERENCE NUMBER: 9002/001/60/1

ISIN CODES:	Class R	ZAE000020699
	Class B1	ZAE000048138

Total Expenses (Incl. Annual Service Fee) (31/12/2019)	36 Months		12 Months	
	Class R	Class B1*	Class R	Class B1*
Total Expense Ratio (TER) Incl. VAT	0.89%	0.72%	0.89%	0.72%
Transaction Cost (TC)	0.02%	0.02%	0.02%	0.02%
Total Investment Charge	0.91%	0.74%	0.91%	0.74%

* Please note: The Class B1 fund is only available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

Funds are also available via Old Mutual Wealth and MAX Investments.

FUTUREGROWTH

/ ASSET MANAGEMENT

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 13:00. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 December 2019.
