**RECOMMENDED MINIMUM INVESTMENT TERM**

- 1 year+  
- 3 years+  
- 5 years+

**FUND OBJECTIVE**

The fund aims to achieve long-term inflation-beating growth from a cost-efficient balanced portfolio with an equity exposure typically displayed by multi-asset low equity portfolios conforming to the regulations governing retirement fund investments.

**WHO IS THIS FUND FOR?**

This fund is suited to investors wanting inflation-beating long-term growth in a cost-efficient multi-asset low equity fund with less volatility in the short term compared to a multi-asset medium equity fund. The fund is suitable as a stand-alone retirement investment.

**INVESTMENT MANDATE**

The fund is exposed to all sectors of the market (shares, bonds, property and cash) with a maximum of 40% exposure to equities and may gain exposure to foreign assets up to a maximum of 30% of its portfolio (with an additional 10% for African ex-SA investments). The fund will have a minimum exposure of 50% to passively managed underlying securities. Derivatives may be used for efficient portfolio management purposes.

**REGULATION 28 COMPLIANCE**

The fund complies with retirement fund legislation. It is therefore suitable as a stand-alone fund in retirement products where Regulation 28 compliance is specifically required.

**BENCHMARK:**

CPI

**PERFORMANCE TARGET:**

CPI + 2% to 3% p.a. (net of fees)

Performance is targeted over the recommended minimum investment term and is not guaranteed.

**ASISA CATEGORY:**

South African – Multi-Asset – Low Equity

FUND COMMENTARY
AS AT 31/12/2019

The broad South African equity market exposure in the fund is primarily through an allocation to the FTSE/JSE Capped SWIX All Share Index (Capped SWIX), which is intended to be a fairer reflection of the investment universe available to a South African investor. The Capped SWIX has a strategic weighting of 25% in the fund and returned 5.27% for the quarter ending February 2020.

The healthcare and basic materials sectors were the best performers returning 20.5% and 13.78% respectively, the worst detractor being telecommunications at -13.31%.

In addition to the broad local equity market exposure, the fund also has exposure to SA Listed property, which has a strategic weight of 5%. The FTSE/JSE SA Listed Property Index returned 0.58% for the quarter ending February 2020.

The international equity exposure is invested in the MSCI All Country World ESG Leaders Index, which has a strategic weighting of 12.5%. The MSCI All Country World ESG Leaders Index offers exposure to both developed and emerging markets globally. The MSCI All Country World ESG Leaders Index returned 8.89% in USD terms. The rand appreciated against the US dollar by 7.8% over the quarter, which would have a negative impact on returns to South African investors.

To diversify the fund away from equity, the fund invests in nominal bonds through exposure to the JSE All Bond Index (ALBI), which has a strategic weighting of 20%. The ALBI increased by 1.73% for the quarter. In addition to the nominal bond exposure, an allocation is also made to inflation-linked government bonds through exposure to the JSE IGOV Index, which has a strategic weight of 10%. The JSE IGOV Index detracted by 0.97% for the quarter.

Funds are also available via Old Mutual Wealth and MAX Investments.

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.

You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.

The fund fees and costs are in charge for managing your investment are disclosed in Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.

Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.

Our cut-off time for the receipt of instructions (eg buying and selling) is 10:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 13:00. These are also the times we value our funds to determine their daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds at 17:00 close). Daily prices are available on the public website and in the media.

Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund’s assets plus income net of expenses (NAV of the portfolio) divided by the number of units on issue.

This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.

The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment experience a significantly lower fee going forward.

Please note: The Class B1 fund is only available through investment platforms such as Old Mutual Wealth.

Please note: The 36-month TER does not have a full 3-year history and is negatively impacted by fixed costs at the inception of the fund. TER is a historic measure and clients are expected to experience a significantly lower fee going forward.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund’s value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The TER and TC cannot be determined accurately for the funds that are less than one year old. Calculations are based on actual data where possible and best estimates where actual data is not available.

Funds are also available via Old Mutual Wealth and MAX Investments.
