

FUND INFORMATION

RISK PROFILE

RECOMMENDED MINIMUM INVESTMENT TERM

FUND OBJECTIVE

The fund aims to deliver returns in excess of those offered by money market funds and similar levels of liquidity, without significantly increasing risk.

WHO IS THIS FUND FOR?

This fund suits risk-averse investors with a short-term investment horizon and who want yields in excess of those on money market investments, but also require high liquidity from their investment and cannot tolerate the higher risk associated with income funds.

INVESTMENT MANDATE

The fund is a specialist yield-enhanced money market portfolio that offers diversification, high liquidity and very low volatility by investing in money market and short-term debt instruments.

Compared to money market unit trusts, it will have a marginally higher risk exposure in order to provide yield enhancement. However, low volatility is a key criterion for this product. The maximum average duration of this fund is 365 days. Derivatives may be used for efficient portfolio management purposes.

REGULATION 28 COMPLIANCE

The fund does not comply with the asset allocation sublimits set out in Regulation 28 of the Pension Funds Act, and therefore the fund is not Regulation 28 compliant.

BENCHMARK:	Alexander Forbes Short-term Fixed Interest Index (STeFI)

FUND COMMENTARY AS AT 30/06/2020

After being downgraded by Moody's towards the end of the first quarter of 2020, the second quarter of the year proved to be an even more challenging period for South Africans and one that will undoubtedly be remembered for the Covid-19 virus. The seriousness and extent of the spread ultimately led to the World Health Organisation declaring a pandemic which sparked global panic and fear. Understandably, this resulted in the collapse of financial markets worldwide as growth and inflation estimates tanked. This already disastrous effect was further compounded by numerous countries around the world implementing a state

of lockdown, with limited trade and activity within their borders, in an effort to control the spread and flatten the curve.

Domestically, in an effort to maintain some form of financial stability, the South African Reserve Bank (SARB) cut the repo rate by another 150 basis points (bps) in Q2 2020. This was in addition to the 125bp cut in Q1 2020. Currently, the bank repo rate is at 3.75% with the latest year-on-year inflation print at 3%. The drastic and unprecedented rate cuts by the SARB led to a corresponding drop in money market rates and, given the adverse effect on the economy, it is anticipated that money market rates could drop further as the SARB tries to stimulate some growth in the country.

This view is reflected in the forward rate agreement (FRA) curve, which is currently pricing in a further 40bp cut over the next six months. The current 12-month negotiable certificate of deposit (NCD) mid-rate is at 4.35%, down 330bps since the

beginning of the year and 187.5bps from the beginning of the quarter – with the spread between 12 months and 3 months JIBAR now at just under 60bps.

We are mindful of the potential downward threats to the economy. The low growth environment linked with the low inflation outlook is pointing to lower interest rates for a longer scenario. We will thus look at extending the fund's weighted average duration by buying longer-dated fixed rate assets.

The Treasury Bill market is currently trading at a substantial margin above bank NCDs, because of the increase in issue size. We are participating at the weekly Treasury Bill auction to buy these better rated assets at higher yields. Additionally, we remain buyers of longer-dated floating rate assets as these instruments help in managing the interest rate risk and running yield of the fund.

OTHER INVESTMENT CONSIDERATIONS

MINIMUM INVESTMENTS:

- Monthly: R500
- Lump sum: R10 000
- Ad hoc: R500

INITIAL CHARGES (Incl. VAT)*:

There is no initial administration charge for investment transactions of R500 and above. Initial adviser fee will be between 0% and 3.45%.

Investment transactions below the R500 fund minimum incur a 2.30% administration charge.

* Please note: Initial charges do not apply to the Class B funds.

ONGOING

	Class A	Class B1*
Annual service fees (excl. VAT)	0.55%	0.40%

* Please note: The Class B1 fund is available through investment platforms such as Old Mutual Wealth.

The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms.

TAX REFERENCE NUMBER: 9284/966/17/4

ISIN CODES:	Class A	ZAE000160347
	Class B	ZAE000171070

Total Expenses (Incl. Annual Service Fee) (30/06/2020)	36 Months		12 Months	
	Class A	Class B1*	Class A	Class B1*
Total Expense Ratio (TER) Incl. VAT	0.65%	0.48%	0.65%	0.48%
Transaction Cost (TC)	-	-	-	-
Total Investment Charge	0.65%	0.48%	0.65%	0.48%

* Please note: The Class B1 fund is available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

Funds are also available via Old Mutual Wealth and MAX Investments.

FUTUREGROWTH

/ ASSET MANAGEMENT

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.oldmutualinvest.com or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 13:00. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 July 2020.
