

## FUND INFORMATION

### RISK PROFILE

### RECOMMENDED MINIMUM INVESTMENT TERM

### FUND OBJECTIVE

The fund aims to generate a return in line with the FTSE/JSE RAFI® 40 Index. Its primary objective is to provide long-term capital growth, with a secondary objective of delivering a reasonable income over time.

### WHO IS THIS FUND FOR?

This fund is suited to investors who want to grow capital over the long term by tracking the FTSE/JSE RAFI® 40 Index. The investor can tolerate stock market volatility.

### INVESTMENT MANDATE

The fund invests in shares included in the FTSE/JSE RAFI® 40 Index, tracking the weightings of each company as closely as possible. This RAFI® Index comprises listed companies rated according to four financial factors: cash flow, sales and dividends (averaged over 5 years) as well as book value at review date. Derivatives can be used to enable the portfolio to more effectively track the RAFI®.

### REGULATION 28 COMPLIANCE

The fund aims to achieve long-term inflation-beating growth, and therefore may hold a higher allocation to equities than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

## FUND COMMENTARY as at 31/03/2019

The fund tracks the FTSE/JSE RAFI® 40 Index and its shareholdings mirror the shares that make up this benchmark. At month-end the benchmark sector allocation was as follows:

Sector	Weight (%)
Materials	36.6
Financials	28.9
Consumer Discretionary	13.4
Consumer Staples	8.5
Telecommunication Services	8.2
Healthcare	2.3
Industrials	2.1
Energy and Utilities	0.0
Information Technology	0.0

In contrast to market capitalisation-weighted indices, this index's composition reflects the underlying companies' economic footprint, using fundamental measures to determine weightings. The index data is supplied by Research Affiliates® (RAFI®) and is based on historic sales, cash flow, dividends paid and book value.

Cash exposure in the fund is kept as low as possible to give investors the full benefit of being invested in the benchmark index.

Investment flows are matched with the corresponding market transactions on a daily basis to ensure that the performance of the fund is in line with its benchmark. Futures contracts are used, when appropriate, to minimise trading costs.

The FTSE/JSE RAFI® 40 Index underperformed relative to the FTSE/JSE Top 40 Index for the quarter ending 31 March 2019; the RAFI® 40 Index yielded a return of 7.5% for the quarter, relative to the 8.5% return of the market-capitalisation weighted Top 40 Index. The FTSE/JSE RAFI® 40 Index, however, outperformed the FTSE/JSE Top 40 Index for the year ending 31 March 2019 by 0.3%.

The fund rebalances quarterly in line with the index. There were two constituent additions to the index (Life Healthcare and Mondi), and five deletions (Exxaro, Imperial, Motus, Multichoice and Steinhoff). The rebalanced index was effective at open on Monday, 18 March 2019.

As a fundamentally weighted index, the RAFI® methodology favours stocks with a value bias and within the South African context the methodology favours the resources sector as a source of value.

\* Please note: The Class B1 Fund is only available through investment platforms such as Old Mutual Wealth.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at [www.omut.co.za](http://www.omut.co.za) or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 13:00. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 March 2019.
