

OLD MUTUAL SA QUOTED PROPERTY FUND

FUND INFORMATION

RISK PROFILE

RECOMMENDED MINIMUM INVESTMENT TERM

FUND OBJECTIVE

The fund aims to remain fully invested at all times to generate sustainable pre-tax income whilst growing the original capital invested.

WHO IS THIS FUND FOR?

This fund is suitable for investors seeking exposure to the property market without the potential difficulties and capital outlay of direct property investments. The investor can accept the volatility of investing in the property sector.

INVESTMENT MANDATE

The fund invests in a selection of listed South African commercial and industrial property shares. Income is derived from property shares that offer a secure and an escalating income stream. Capital growth comes from quality shares that show potential for an upward share price movement.

REGULATION 28 COMPLIANCE

The fund aims to offer exposure to a specific asset class, and may hold a higher allocation to equities and a greater exposure to a single equity than what is allowed in terms of Regulation 28 of the Pension Funds Act. This fund is therefore not Regulation 28 compliant.

OLD MUTUAL SA QUOTED PROPERTY FUND

FUND MANAGER INFORMATION

EVAN ROBINS
PORTFOLIO MANAGER

- BBusSc (Hons), MA (Research Psychology), MBA (Distinction), CFA
- 16 years of investment experience

FUND COMMENTARY as at 31/12/2018

The FTSE/JSE SA Listed Property Index (SAPY) provided a -5.1% total return for the final quarter of 2018. This was worse than the JSE All Bond Index's +1.6%, but better than the FTSE/JSE All Share Index's -7.8%. This is despite the general retail sector doing well (+4.7%). The impact of a struggling local economy on property prospects took its toll.

Over the past 12 months, the listed property index's total return has been a dismal 26% compared with the FTSE/JSE All Share Index's -13.7% and the All Bond Index's +6.5%. Over this period, our fund's performance after fees was more than 6% higher than its SAPY benchmark. This was primarily because we were very underweight to the Resilient group of companies as, on our analysis, they were excessively expensive. Other stock picks also contributed to the fund's outperformance. The fund will continue to hold meaningful positions in a diversified

selection of property shares that we believe offer the most long-term value.

The sector's yield has increased significantly. At the time of writing the SAPY benchmark had a 10% forward dividend yield (this was 6.8% at the start of the year) compared to 9.5% on the SA 10-year bond.

Near-term distribution growth should be positive, but below inflation, and the sector offers an attractive yield. Conditions remain difficult for property, with disappointing GDP growth, cost increases constraining net rental growth and significant over-rentals on renewal in some pockets (especially in offices, which also faced significant potential new supply). Malls are facing a tougher environment, a key concern. There is too much retail space in some nodes, sales are weak, trading density is flat and tenants' profitability is under pressure. An improvement in economic sentiment is required.

Bond yields are the key short-term driver of capital value volatility. Increased foreign exposure continues to change the make-up of the sector.

OTHER INVESTMENT CONSIDERATIONS

MINIMUM INVESTMENTS:

- Monthly: R500
- Lump sum: R10 000
- Ad hoc: R500

INITIAL CHARGES (Incl. VAT)*:

There is no initial administration charge for investment transactions of R500 and above. Initial adviser fee will be between 0% and 3.45%.

Investment transactions below the R500 fund minimum incur a 2.30% administration charge.

* Please note: Initial charges do not apply to the Class B funds.

ONGOING

	Class A	Class B4*
Annual service fees (excl. VAT)	1.25%	0.85%

* Please note: The Class B4 Fund is only available through investment platforms such as Old Mutual Wealth. The fee is accrued daily and paid to the management company on a monthly basis. Other charges incurred by the fund, and deducted from its portfolio, are included in the TER. A portion of Old Mutual Unit Trusts' annual service fees may be paid to administration platforms.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

Funds are also available via Old Mutual Wealth and MAX Investments.

- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at www.omut.co.za or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 13:00. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- Specialist equity funds may hold a greater risk as exposure limits to a single security may be higher.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 December 2018.
