## FUND COMMENTARY as at 31/03/2019

The Old Mutual Top 40 Fund tracks the FTSE/JSE Top 40 Index and its shareholdings replicate the constituents that make up this benchmark. At month-end the benchmark sector allocation was as follows:

- Resources : 28.05%
- Financials : 19.94%
- Property : 2.05%
- Industrials : 49.94%

Cash exposure in this fund is kept as low as possible to give investors the full benefit of being invested in equities. Investment flows are matched with the corresponding market transactions on a daily basis to ensure that the performance of the fund is in line with its benchmark. Futures contracts are used, when appropriate, to minimise trading costs and gain exposure to equities.

Long-term investors choose this fund because they are looking for a pure equity fund and are cost conscious. Investors seeking consistency can use this fund as their core portfolio strategy and assign smaller portions to other investment vehicles that aim to outperform the market.

The FTSE/JSE Top 40 Index returned 8.45% over the quarter and 1.94% for the month of March 2019. The Mid and Small Cap Index returned 2.76% and -3.41% respectively for the quarter and -1.82% and -2.71% for the month of March 2019. Basic materials and consumer goods were the biggest sector performers this quarter with 18.04% and 12.38% respectively. The worst performing sectors were healthcare and industrials, with returns of -12.70% and -3.90% respectively.

Among the top performing shares for the quarter were Anglo American Platinum Ltd, British American Tobacco Plc and Capitec Bank Holdings Ltd, with returns of 36.8%, 27.4% and 20.8% respectively. The worst performing shares were Aspen Pharmacare Holdings Ltd, Mr Price Group Ltd and Sappi Ltd, with returns of -31.0%, -23.0% and -18.4% respectively.

The fund rebalances once every quarter in line with the index. There were two constituent additions to and two constituent deletions from the FTSE/JSE Top 40 Index, which rebalanced as at close on Friday, 15 March 2019.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at [www.omut.co.za](http://www.omut.co.za) or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except the Money Market Funds, the price of which is set at 13:00. These are also the times we value our funds to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 31 March 2019.
