## GROWTH OBJECTIVE

### TARGET RETURN

For the underlying portfolio

|                            |                  |
|----------------------------|------------------|
| <b>Target Return</b>       | <b>Gross</b>     |
| Absolute Growth Portfolios | CPI + 6.20% p.a. |

The portfolio's Gross Target Return is over the long term and is gross of capital charges and investment management fees.

For each guarantee option

Bonuses are applied to investments net of capital charges. As such, we arrive at the Net-of-Capital Charge Target Return for each guarantee option by deducting the Capital Charge for each option from the underlying portfolio's Gross Target Return.

| Guarantee option       | Capital Charge | Net-of-Capital Charge Target Return |
|------------------------|----------------|-------------------------------------|
| Absolute Smooth Growth | 0.20%          | CPI + 6.0% p.a.                     |
| Absolute Stable Growth | 0.70%          | CPI + 5.5% p.a.                     |
| Absolute Secure Growth | 2.70%          | CPI + 3.5% p.a.                     |

Target returns are what the portfolio aims to deliver over the long term and are not guaranteed.
