## FUND INFORMATION

### RISK PROFILE

### RECOMMENDED MINIMUM INVESTMENT TERM

### FUND OBJECTIVE

The Absolute Smooth Growth Portfolio targets inflation-beating returns over the long term (in excess of ten years), using smoothing to substantially reduce the market volatility experienced by investors.

### WHO IS THE FUND FOR?

This fund is aimed at investors who seek a real return with reduced market volatility and a 50% guarantee on benefit payments. The fund is most suited to investors saving towards a specific goal over a period in excess of five years, such as retirement, a child's education or a significant future purchase.

### BONUS PHILOSOPHY AND SMOOTHING

The underlying investment of the fund is in line with that of an aggressive balanced fund. The returns earned on the underlying investments are smoothed and passed on to investors by way of bonuses declared monthly in advance.

This smoothing mechanism significantly reduces the short-term volatility associated with aggressive market-related investments. A Bonus Smoothing Reserve is maintained, which absorbs the impact of the peaks and troughs experienced in the market, while delivering real returns to investors in the long term.

### GUARANTEE AND MARKET VALUE ADJUSTMENT

The Absolute Smooth Growth Portfolio offers a 50% guarantee on the net amount invested and bonuses earned in the fund. This guarantee applies to Defined Benefit Payments, where the full Fund Value is available for:

- Retirement Annuities, Preservation Funds and Living Annuities: retirement, death, ill-health retirement and annuity income payments.
- Investment Plans (LIFE): death and on the Guaranteed Smoothed Value Date, which is set 5 years from the day of the first investment into the fund, and every 5-year anniversary thereafter.

A Market Value Adjustment (MVA) is an adjustment applied to an investor's smoothed value to reflect current market conditions when the value of the underlying investments is less than the smoothed value. An MVA can only be applied on withdrawals from the fund (including switches) that are not Defined Benefit Payments as set out above.

Guarantees are backed by Old Mutual shareholders' capital.

Old Mutual reserves the right to remove the non-guaranteed element in poor markets by declaring a negative bonus.

<b>BENCHMARK:</b>	CPI
<b>PERFORMANCE TARGET:</b>	The portfolio has a growth objective of CPI + 5.0% p.a. (after fees) over the long term (in excess of ten years). Over the medium term (5-10 years) the objective is to provide returns in excess of CPI. The growth objectives are targets and not guaranteed returns.

## OTHER INVESTMENT CONSIDERATIONS

### INITIAL CHARGES:

There is no initial administration charge on the fund.

### ONGOING

Investment Management Fee (IMF)	1.00% p.a.
Capital Charge <sup>1</sup>	0.20% p.a.

Total Expenses	
Total Expense Ratio (TER)	1.02%
<i>Performance Fee (incl. in TER)<sup>2</sup></i>	<i>0.03%</i>
Transaction Cost (TC)	0.07%
Total Investment Charge <sup>1</sup>	1.09%

<sup>1</sup> Please note the Total Investment Charge shown above excludes the Capital Charge. As a total charge to investor, this would need to be added.

<sup>2</sup> Performance fees are charged on alternative assets and assets held with external asset managers outside of the Old Mutual Group.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the investment management fee and performance fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.
