HOW SECURE IS YOUR P@5SW0RD?

Cyber criminals can crack weak passwords in seconds. This is why it is important that each online account have different interactions.

The length and strength of your password can make a huge difference in how long it takes for hackers to crack the code!

AVOID THE FOLLOWING:

Special dates such as birth and anniversary dates, pet names, spouses and children's names or even your address.

USE STRONG, UNIQUE PASSWORDS. E.G. PHR@ZE1024!

LENGTH MATTERS, THE LONGER THE BETTER.

USE A PASSWORD MANAGER - DO NOT WRITE YOUR PASSWORD DOWN.

KEEP YOUR PASSWORD A SECRET DON'T TELL ANYONE.

DID YOU KNOW?

USE MULTI-FACTOR AUTHENTICATION ALONG WITH YOUR PASSWORD.

Multi-Factor-Authentication requires a secondary code sent via text message or an authenticator app before accessing an account.

Use a Passphrase, like a line from a song or a joke. For example: How to Save a Life! = H2s@Life2365!

Passwords should be at LEAST 8 characters long and use a minimum of one of each below:

- UPPERCASE characters (A-Z)
- Lowercase characters (a-z)
- Numbers (0-9)
- Special characters (symbols) (!$#%@&*[<>)
- Avoid using passwords that you have used in the last 12 password resets.
- Avoid any common passwords, for example with words like Old Mutual, Summer/Winter/Autumn/Spring.

What to do when you think your password may have been compromised?
Call the Tip-offs anonymous toll free number Old Mutual: 0800 222 117 or MoneyAccount: 0860 222 252 Email: toahotline@tip-offs.com
Visit www.tip-offs.com (This anonymous service is provided by Deloitte - a multinational auditing and accounting firm)
