## FUND INFORMATION

### RISK PROFILE

### RECOMMENDED MINIMUM INVESTMENT TERM

### ESG FUND RATING

The environmental, social and governance (ESG) fund ratings are based on the exposure of the underlying assets held to industry-specific ESG risks and the ability to manage those risks relative to peers.

### FUND OBJECTIVE

The fund aims to offer investors an ethical investment that provides steady, long-term capital growth, as well as a moderate level of income via a portfolio that diversifies across asset classes and regional exposure. The Shari'ah Supervisory Board oversees adherence to the applicable Shari'ah principles. This fund specifically adheres to the standards of the Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI) as interpreted by the Shari'ah Supervisory Board.

### WHO IS THIS FUND FOR?

This fund is suited to investors wanting moderate to high long-term growth from their Shari'ah compliant investment, with less volatility in the short term than pure equity. It is suitable as a stand-alone retirement investment.

### NON-PERMISSIBLE INCOME

Incidental income deemed to be non-permissible is paid to the charitable trust elected by the Shari'ah Supervisory Board in line with the principles of Shari'ah and the supplemental deed of the fund. Non-permissible income does not form part of the investor's income.

### INVESTMENT MANDATE

The fund is a Shari'ah compliant asset allocation fund that offers investors access to local and international asset classes including equity, liquid assets and non-equity securities, such as sukuku (Islamic bonds) and equity conduits. It may also invest in the portfolios of other unit trusts, both locally and those registered in countries with acceptable regulatory environments. This fund may invest up to 45% (including Africa) of its portfolio offshore.

### REGULATION 28 COMPLIANCE

The fund complies with retirement fund legislation. It is therefore suitable as a stand-alone fund in retirement products where Regulation 28 compliance is specifically required.

Market activity over the first half of the year reflects unexpectedly high inflation in several regions, which has fostered uncertainty and policy differences around the world. The European Central Bank is preparing for its first interest rate hike in more than a decade, and in the UK, stagflation seems to be taking root. In contrast, inflation remains low in Japan, as it continues to stay the course with its loose monetary policy contributing towards dramatic moves in the yen in the second quarter. China looks somewhat countercyclical to developed economies, as it eases policy to help achieve the government's GDP growth target of 5.5%, while enforcing a Zero-Covid agenda that has stifled economic activity and negatively impacted commodity prices. With no end seemingly in sight to the Russia/Ukraine war, geopolitical instability continues to cloud the global outlook.

Looking ahead, it is clear that US interest rates are going up, and the Purchasing Managers' Index (PMI), an important signal of economic conditions, is pointing downward. In previous economic slowdowns and inflationary periods, corporate margins and earnings revisions came down significantly as the PMI bottomed. Earnings expectations have not yet adjusted to an economic slowdown.

Companies with attractive free cash flow yields, pricing power and healthy balance sheets have historically performed better through economic slowdowns and recessions. Pricing power helps companies maintain margins in inflationary times while fortress balance sheets and low debt levels offer protection from a rising interest rate cycle and allow astute company management to invest countercyclically when valuations are depressed. From an asset allocation perspective, we are 40% invested in Islamic income instruments, 21.6% in global equity and 38% in local equity.

Amidst the market turbulence, the good news is that investors should remember that nothing lasts forever, including downturns. As an asset class, equities remain a key source of long-term returns, diversification and inflation hedging, even in economically challenging periods with elevated market volatility. Following recent market falls, current valuations point to improved future expected returns. We are confident that the portfolio is well positioned to navigate the market uncertainty and to create long-term wealth for our clients.

## FUND COMMENTARY

Global equities fell sharply in the second quarter as US markets slid into bear market territory. The MSCI World Index fell 14.3% in the second quarter and 18.3% in the first half of 2022. Over the same periods, the S&P 500 tumbled by 16.1% and 20% respectively. Regional returns were diverse, with relatively modest declines in the UK and Japan, while emerging market losses were offset by gains in Chinese stocks. These performances made the first half of 2022 the weakest start for global equities in nearly 50 years. The JSE All Share Index fell 11.7% during Q2 and 8.3% in H1 of 2022.

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

We aim to treat our clients fairly by giving you the information you need in as simple a way as possible, to enable you to make informed decisions about your investments.

- We believe in the value of sound advice and so recommend that you consult a financial planner before buying or selling unit trusts. You may, however, buy and sell without the help of a financial planner. If you do use a planner, we remind you that they are entitled to certain negotiable planner fees or commissions.
- You should ideally see unit trusts as a medium- to long-term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, we cannot guarantee the investment capital or return of your investment. How a fund has performed in the past does not necessarily indicate how it will perform in the future.
- The fund fees and costs that we charge for managing your investment are disclosed in this Minimum Disclosure Document (MDD) and in the table of fees and charges, both of which are available on our public website or from our contact centre.
- Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained, free of charge, from Old Mutual Unit Trust Managers (RF) (Pty) Ltd, from our public website at [www.oldmutualinvest.com](http://www.oldmutualinvest.com) or our contact centre on 0860 234 234.
- Our cut-off time for client instructions (e.g. buying and selling) is at 15:00 each working day for all our funds, except for our money market funds, where the cut-off is at 12:30.
- The valuation time is set at 15:00 each working day for all our funds, excluding our money market funds which is at 13:00, to determine the daily ruling price (other than at month-end when we value the Old Mutual Index Funds and Old Mutual Multi-Managers Fund of Funds range at 17:00 close). Daily prices are available on the public website and in the media.
- Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in scrip lending. The daily ruling price is based on the current market value of the fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue.
- This fund holds assets in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information.
- The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Annualised returns are the weighted average compound growth rates over the performance period measured. Performances are in ZAR and as at 30 June 2022.
