

OLD MUTUAL MAXIMISED INTEREST FUND (LIFE)

OCTOBER 2021

FUND INFORMATION

RISK PROFILE

RECOMMENDED MINIMUM INVESTMENT TERM

FUND OBJECTIVE

The fund aims to provide investors with a stable return which consistently outperforms money market or other short term assets over the same period.

WHO IS THIS FUND FOR?

This fund is suitable for investors wanting a low cost investment aiming to achieve a stable return by outperforming money market and short term assets. The interest rate is fixed for a forward looking 3-month period.

INVESTMENT MANDATE

The fund invests policyholder assets with Old Mutual Finance (Pty) Ltd (OMF), a member of the Old Mutual Group, who in turn provides the interest rate return on capital invested. The interest rate earned from the fund will be quoted as an annual effective rate compounded monthly. The rate will be recalculated at the start of each calendar quarter and then remain fixed until the end of the quarter. The rate is linked to the movement in the 3-month JIBAR rate. The rate currently applicable is shown under the heading CURRENT INTEREST RATE. Old Mutual does not guarantee any capital invested in the fund or the rate declared by OMF.

PERFORMANCE TARGET:	A market-related return with reference to movements in the 3-month JIBAR interest rate.

The next interest rate review date is 2 January 2022.

* Annual effective rate compounded monthly (net of Management Fee).

OTHER INVESTMENT CONSIDERATIONS

INITIAL CHARGES:

There is no initial administration charge on the fund.

ONGOING

Annual service fees	0.25%
---------------------	-------

Total Expenses

Total Expense Ratio (TER)	0.25%
Transaction Cost (TC)	-
Total Investment Charge	0.25%

TER is a historic measure of the impact the deduction of management and operating costs has on a fund's value. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER, which includes the annual service fee, may not necessarily be an accurate indication of future TERs. Transaction Cost (TC) is a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.
